Abstract

This is an instruction for abstract preparation for International Conference on Applied Statistics 2017. Please strictly follow this guideline. The abstract should summarize the context, content and conclusions of the paper. Please provide an abstract about 150 to 300 words (10-Point Times New Roman), indented 1.19 cm from the left and right margins.

Keywords: keyword1, keyword2, keyword3 (3-5 keywords separated by a comma and a space, 10-Point Times New Roman)

1. Introduction

This is an instruction for manuscript preparation for publication in proceeding of International Conference on Applied Statistics 2017. Please strictly follow this guideline. Contributions are to be in English. Authors are encouraged to have their contribution checked for grammar. American or British spelling can be used. The length of manuscript should not exceed 15 pages.

2. Research Methodology

Please use A4 paper size (21.0 cm x 29.7 cm). Page margins should be set as: top, bottom, and left for 2.54 cm, and right for 1.50 cm. Paragraph tab should be set at 0.5 cm. The space between lines is single space. One blank line should be given between section headings. The text is to be typeset in 12-Point Times New Roman.

The main body should consist of the following sections.

1. Introduction
2. Research Methodology
3. Research Results and Discussions
4. Conclusions and Recommendations
5. Acknowledgements (where applicable)
6. References
7. Appendices (where applicable)

3. Research Results and Discussion

3.1 Numbering

Please divide your manuscript into clearly defined sections and they should be numbered as 1, 2, etc. Each heading should appear on its own separate line and should be **bold**. Subsections should be numbered 1.1 (then 1.1.1, 1.1.2, ...), 1.2, etc. Any subsection may be given a brief heading, and it should be *italicized*.

3.1.1 Equations

Displayed equations should be numbered consecutively in each section, with the number set flush right and enclosed in parentheses. Equations may be created by MathType or Equation Editor.

$$f(x) = \frac{1}{2\pi\sigma^2} \exp\left(-\frac{1}{2\sigma^2}(x-\mu)^2\right), -\infty < \mu < \infty, \sigma^2 > 0 \quad (1)$$

$$\hat{\beta}_1 = \frac{n \sum_{i=1}^n x_i y_i - \left(\sum_{i=1}^n x_i\right) \left(\sum_{i=1}^n y_i\right)}{n \sum_{i=1}^n x_i^2 - \left(\sum_{i=1}^n x_i\right)^2} \quad (2)$$

3.1.2 Figures and Tables

Figure captions with 10-point should be below the figures as shown in Figure 1. Table captions with 10-point should be above the tables as shown in Table 1. Type your text in table with 10-point. Please number figures and tables consecutively, and use the number when referring to the figure in text. For examples, see Figure 1 and Tables 1.

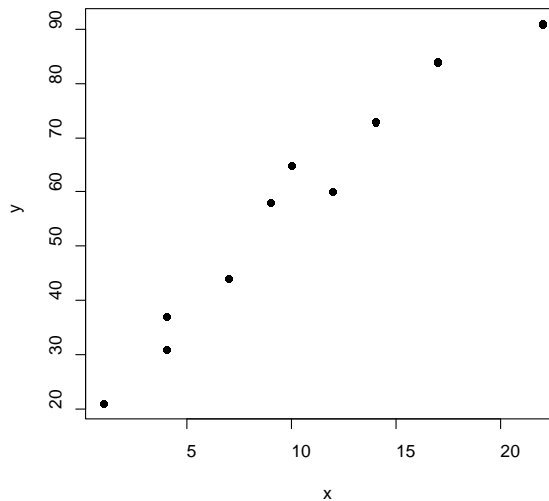

Figure 1: Title of the figure 1

Table 1: Title of the table 1

Parameters	Value1	Value2	Value3
A	0.4	1.0	10.45
B	0.5	2.0	20.45
C	0.6	3.0	35.43
D	0.7	4.0	32.60

4. Conclusions and Recommendations

Clearly indicate advantages, limitations and possible applications of your research results should be included in this section. This summary should not be too long.

5. Acknowledgements

A brief acknowledgement section may be included here.

6. References

This section should follow the Vancouver style. When referenced in the text, enclose the citation number in square brackets. For example, see [1]. Multiple references can be indicated as [3-5, 9]. Please do not use “Ref. [1]” or “Reference [1]” except at the beginning of a sentence such as “Reference [1] was the first ...”.

Do not use the phrases “et al.” in the reference section. The names of all authors must be listed.
